Education

Bachelor of Science Informatics Engineering

University Computer of Indonesia (UNIKOM)
2015 – 2020

TECHNICAL SKILLS

Backend : .NET 8, ASP.NET Core Web API, C#, Java Spring Boot, Entity Framework Core, RESTful API Design, Clean Architecture.

Frontend : React 18, Angular, TypeScript, TailwindCSS, Zustand, React Query, HTML5/CSS3.

Cloud & Infrastructure: AWS Lambda (Serverless), AWS S3, Azure Active Directory (Azure AD), JWT Authentication, CI/CD Pipelines.

Databases: PostgreSQL, SQL Server, Redis.

Tools & Platforms: Git, Jira, Figma, DataGrip, IntelliJ IDEA, Sumo Logic.

LANGUAGES

Indonesian: Native
English: very functional

ANRI NOBEL

Full Stack Developer

👤 PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with over 5 years of experience in designing, developing, and maintaining scalable enterprise-grade web applications. Expert in .NET 8, React 18, and Angular ecosystems. Proven track record in implementing Clean Architecture, serverless infrastructure (AWS Lambda), and secure identity management (Azure AD/JWT). Adept at optimizing high-performance APIs and delivering production-ready software that aligns with complex business requirements.

📁 Work Experience

Present

Mitra Solusi Telematika

Full Stack Developer

-

2025

- Architected the Vendor Performance Management System (VPMS) using .NET 8 following Clean Architecture principles.
- Built scalable backend services deployed via AWS Lambda serverless infrastructure.
- Designed and implemented database architecture using PostgreSQL and integrated AWS S3 for secure document storage.
- Developed modern SPA frontend using React 18, TypeScript, and TailwindCSS.
- Implemented state management using Zustand and data fetching with React Query.
- Integrated enterprise authentication using Azure Active Directory and JWT bearer tokens.
- Developed automated PDF reporting system using jsPDF and html2canvas, supporting digital signatures and official reporting workflows.

Project-based

BPJS Kesehatan

Programmer

-

2025

- Developed web applications for health service management using ASP.NET
- Core Web API and Angular.
- Implemented Entity Framework Core for structured database management
- in SQL Server.
- Built secure authentication and authorization features using JWT.
- Optimized database queries, improving system performance and reliability.
- Maintained and enhanced existing web and mobile applications to meet
- evolving business requirements

Work Experience

2025	Transcosmos Indonesia
-	Web Administrator / Web Programmer
2021	• Data-Driven Strategy: Analyzed traffic and engagement metrics via Google Analytics to optimize content strategies. • UI/UX Leadership: Led website redesigns and responsive interface projects to enhance accessibility and visitor engagement. • Visual Collaboration: Customized layouts in collaboration with designers to improve website aesthetics. • Disaster Recovery: Managed application backups and data integrity to ensure robust disaster recovery. • System Administration: Streamlined administration strategies, including patch development, system upgrades, and change management. • Technical Documentation: Authored documentation and instruction manuals to enable seamless technical and end-user support. • High-Volume Deployment: Orchestrated the Mass production of landing pages for large-scale digital campaigns
Current	Freelancer
-	Full Stack Developer
2019	• Built responsive web interfaces with Angular/React and dynamic UI features. • Developed ASP.NET Core APIs integrated with SQL Server; optimized queries. • Created cross-platform mobile apps (React Native, Android/iOS) with secure authentication and real-time data sync. • Fixed bugs, enhanced features, and delivered client-ready solutions.
2019	AL Gorup – Crerative
-	Full Stack Developer
2017	• Led website redesign initiatives improving usability and user engagement. • Managed website administration including system upgrades, patching, and backups. • Implemented analytics tracking using Google Analytics. • Created documentation and user guides for technical and end-user support. • Managed large-scale landing page deployment for digital marketing campaigns.

SELECTED PROJECTS

Vendor Performance Management System (VPMS)	Healthcare Service Management Platform
Enterprise system designed to digitize vendor evaluation processes.	Healthcare system used to manage internal service workflows.
Technologies: .NET 8, React 18, PostgreSQL, AWS Lambda, AWS S3, Azure AD	Technologies: ASP.NET Core, Angular, SQL Server, JWT Authentication
Key Features:	Key Features:
• Vendor evaluation workflow automation • Role-based access control • Digital reporting with PDF export • Secure authentication and authorization	• Secure API architecture • Database management with Entity Framework • Optimized database queries for performance
SaaS Admin Dashboard (Portfolio Project)	E-Commerce Backend API (Portfolio Project)
Modern admin dashboard designed for SaaS applications.	REST API backend for e-commerce platform.
Technologies: .React, ASP.NET Core API, PostgreSQL, Redis	Technologies: ASP.NET Core, PostgreSQL, Redis
Key Features:	Key Features:
• User management system • Analytics dashboard • Role-based access control	• Product management • Order processing • Payment gateway integration
